REV. F. PAGE-ROBERTS—Yellow with red shading, large, very fragrant. 50c each or 3 for \$1.25.

PINK RADIANCE—Strong upright grower. Most prolific bloomer known. 40c each or 3 for \$1.00.

TALISMAN—One of the most beautiful of the flame roses. Glowing golden yellow stained copper red. 60c each or 3 for \$1.50.

Other Varieties of Everblooming Roses

ALEXANDER HILL GRAY—A pale lemon-yellow 40c each or 3 for \$1.00.

COLUMBIA—Bright pink, sweetly scented, free flowering. 40c each or 3 for \$1.00.

CRUSADER—Rich, velvety crimson. Massive. Splendid foliage. 40c each or 3 for \$1.00.

FRANCIS SCOTT KEY—Very double, large deep red. 40c each or 3 for \$1.00.

HOOSIER BEAUTY—Glowing crimson, free bloomer, fragrant. 40c each or 3 for \$1.00.

J. L. MOCK—Outside petals cherry red, inside silvery white. 40c each or 3 for \$1.00.

MME. BUTTERFLY—Bright light pink shaded gold. 40c each or 3 for \$1.00.

MME. EDOURADS HERRIOT—Coral-red shaded yellow and bright rosy scarlet. One of the most brilliant colored roses. 40c each or 3 for \$1.00.

MRS. AARON WARD—Center Indian yellow, edge primrose Dwarf. 40c each or 3 for \$1.00.

OPHELIA—Attractive light salmon shading to light yellow. 40c each or 3 for \$1.00.

OPHELIA GOLDEN—Golden yellow. Seedling of Ophelia. **40c each or 3 for \$1.00.**

RADIANCE RED—Bright rosy red, sport of Radiance. 40c each or 3 for \$1.00.

SOUV. DE CLAUDIUS PERNET—Lovely sunflower yellow. 60c each or 3 for \$1.25.

LADY HILLINGTON—Deep orange yellow. Good size. Valuable. 40c each or 3 for \$1.00.

GRUSS AN TEPLITZ—Bright scarlet crimson. Blooms profusely. 40c each or 3 for \$1.00.

MRS. CHAS. BELL—Profuse bloomer. Shell-pink, one of the best. 40c each or 3 for \$1.00.

DUCHESS OF WELLINGTON—Large, saffron-yellow. Fragrant. 50c each or 3 for \$1.25.

EDWARD MAWLEY—Dark crimson, one of the best. 40c each or 3 for \$1.00.

GOLDEN EMBLEM—A beautiful rich yellow, glossy foliage. 40c each or 3 for \$1.00.

PRES. HERBERT HOOVER—Medium orange to lighter shade. 75c each or 3 for \$1.75.

F. K. DRUSCHKI—Large snow white. Known as W. American Beauty. 40c each or 3 for \$1.00.

GEN. JACK.—Rich crimson-scarlet, very fragrant. 40c each or 3 for \$1.00.

PAUL NEYRON—Deep rose, immense size. Hardy, vigorous. 40c each or 3 for \$1.00.

Baby Dwarf Roses

Prices 40c each or 3 for \$1.00.

LAFAYETTE—Large blooms, cherry red, best bedding rose.

CATHERINE ZEIMET—Double, pure white, fragrant. Large clusters.

ERNA TESCHENDORF—Bright crimson, free bloomer, large clusters.

GEO. ELGERS—Golden yellow buds, opening lighter in color.

Climbing Roses

Prices 40c each or 3 for \$1.00

AMERICAN PILLAR—Single rose pink, white center. Virgorous.

CLIMBING AMERICAN BEAUTY—Beautiful large buds opening bright crimson.

DR. VAN FLEET—Pale pink on fine, long stems. Beautiful.

GARDENIA—Large creamy yellow flowers. Vigorous. PAUL'S SCARLET—Semi-double, shining vivid red. Climber.

SILVER MOON—Silvery white with yellow stamen. Semi-double.

Flowering Shrubs

ALTHEA (Rose of Sharon)—Double variety resembles the Carnation. 50c each; 4 for \$1.50.

RED BARBERRY—Foliage Red-Fine for low shrub when planted in a sunny location.50c each; 4 for \$1.50.

JAP. BARBERRY—Low shrub and covered in the winter with red berries. Heavy shrubs, 50c; Medium, 40c; light, 20c.

CRAPE MYRTLE—Beautiful shrub blooms all summer, requires sun. Colors in white, red, pink and purple. 2-3 ft., 50c.

DESMODIUM—Profuse blooming shrub. Purple flowers in fall dropping. **40c.**

ALMOND—Rose pink. April. Blooms before the leaves appear. 40c each.

BUTTERFLY BUSH—Called summer lilac. Blooms all summer. Long purple flowers. Good for cutting. 30c each.

FORSYTHIA—The first shrub to bloom in the spring. Blooms yellow. 40c each.

PERSIAN LILAC—Medium tall grower. Flowers lavender. Blooms first year after planting. 50c each.

FRENCH LILACS—Red, pink, white, lavender, and blue. 60c each.

GOLDEN ELDER—Blooms large white. Leaves bright golden yellow when planted in the shade. Large size, 50c; medium, 35c.

HONEYSUCKLE—Blooms pink. Nice bushy shrub. Upright habit. 40c each.

HYDRANGEA (Hills of Snow)—Summer blooming Snowball. Need shade of building. Blooms round and white. 40c.

HYDRANGEA, P. G.—Blooms first are white turning to pink. Needs sun. Flowers are panicle shaped. Two year, 40c each.

SYRINGA (Mock Orange)—Flowers resembles orange blooms. 40c each.

SYRINGA, Virginalis—Well shaped shrub. Double white flowers. Blooms entire summer. 50c each.

GOLDEN PRIVET—Almost evergreen. Foliage gold and green. Dwarf habit. Good for urns. 60c each.

PRUNUS PISSARDI—Brightly colored, leaves purple. A distinct and handsome shrub. Flowers white. Will attract attention. 40c.

prunus triloba—A charming shrub. The whole tree is decked in a fleecy cloud of very double light pink blooms before the leaves appear. 2-3 ft., 30c each; 3-4 ft., 45c each.

KERRIA JAP.—Flowers double, rich yellow. Resembles small Mums. Blooms all summer. Likes shelter of house or building. 50c each.

WEIGELIA, Rosea—Flowers are produced so thick they almost hide the limbs. Grows 5 feet tall. Flowers pink. 40c.

WEIGELIA, Eva Ratkhe—Deep carmine-red flowers. Blooms all summer. 50c each.

SNOWBALL—An old time favorite with snowy white ball shaped flowers. Nice two year plants. 40c each.

TAMARIX (Hispida)—The best of all Tamarix varieties. Foliage soft blue-green; flowers delicate pink. Fine for cutting with roses. 50c each.

SPIREA VAN HOUTTEI—Very graceful, spreading shrub. Most popular of all the spireas. Masses of lacy white flowers early spring. Small size, 10c each; medium, 20c each; large, 40c each.

SPIREA ANTHONY WATERER—Dwarf shrub. Fine for borders and edging. Flowers red all summer blooming period. 40c each; 3 for \$1.00.

SPIREA FROBELLIA—Same as Anthony Waterer only taller and flowers not so bright. 35c each.

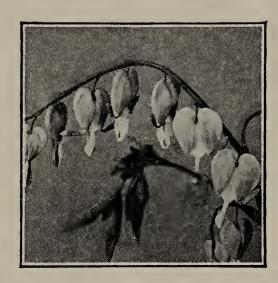

SPIREA THUNGBERGI—Small early bloom. Foliage very pretty and soft. Large, 35c each.

Ornamental Grasses

HARDY PAMPA GRASS—Height, 10 feet. Long plumes. Small division, 25c. Clumps, 50c.

EULALIA GRASSES—Graceful foliage. Height, 5 feet. Plumes appear in fall and will keep all winter. Division, 25c; clumps, 50c.

Hardy Herbaceous Perennials

BLEEDING HEART

COLUMBINE—One of the most beautiful hardy plants. Blooms early summer. 25c each or 3 for 60c.

BLEEDING HEART—Always popular. Long racemes of graceful heart-shaped flowers. 50c each or 3 for \$1.25.

CHRYSANTHEMUM—The hardy "Mums" bloom profusely in October after everything else in the garden has been killed by frost. Yellow, pink and white. 25c each.

COREOPSIS LANCEOLATA—Flowers are rich goldenyellow, borne in great profusion nearly the entire summer. 20c each.

DELPHINIUMS (Larkspur)—Tall showy spikes of blue shades. Blooms from June until frost. 25c each; 3 for 60c.

GRASS PINKS—Very good for borders; blooms all summer. 20c each; 3 for 60c.

GAILLARDI—Daisy-shaped flowers with orange tipped petals shading to scarlet in the center. Bloom all summer. Need sun. 20c each.

BABY BREATH—Dense, spreading plant. Tiny feathery panicles. Delicate foliage. Fine for bouquets, and drying. 20c each; 3 for 50c.

PHLOX—Most popular perennial. Thrives anywhere. Colors, shades of red, pink, white and purple. 20c each; \$1.75 per doz.

GOLDEN GLOW—Golden-yellow dahlia-like flowers borne on tall swaying stems. Blooms summer and fall. 20c each; 3 for 50c.

SHASTA DAISIES—Very well known. Double white flowers. Very good plant. 25c each; 3 for 60c.

PERENNIAL SWEET PEA—One of the best and desirable flowering, hardy, climbing vines, growing to the height of 8-10 feet. Blooms all summer. Fine for cutting. Colors: red, white, pink and purple. 25c each.

ARTEMISIA (Silver King)—Silvery stems and foliage. Good for summer and winter bouquets. 30c each; 3 for 75c.

Bulbs

CANNAS—We have them in several colors. Large flowers. We have pink, red and yellow shades. \$1.00 per dozen.

LILIES, Regals—Hardy in all locations. Very fragrant odor. Grows 4-5 feet tall. Large trumpet-shaped flowers. White on the outside and yellow inside. Large size, 50c; medium, 35c; small, 25c.

ROYAL IMPERIAL—A crimson red. Sends up several stems each bearing many flowers. It is freest bloomer of lilies. Needs sun-light. 50c each; 3 for \$1.40.

TIGER LILY—A well known old lily that is dependable. Light salmon with red spots; blooming in July. 25c each.

GLADIOLAS—Mixed colors, 50c per dozen.; \$3.50 per hundred.

DAHLIAS—Too well known for description. Red, pink, white, yellow. 20c each; 6 for \$1.50.

PEONIES—Selected to color. Dark red, light red, dark pink, light pink, white. 40c each; 6 for \$1.95.

Hardy Climbing Vines

CLEMATIS—Henryi-Flowers large and creamy white, form six to eight petals. 75c each.

Jackmani—Covered from July to October with a dense foliage and purple flowers. A popular variety but a little hard to transplant. 75c each.

Paniculata—Flowers small in size, pure white, borne in immense sheets. It is very fragrant. Large plants, 50c.

Ivy Vines

Boston Ivy—Small leaves and dainty. By over-lapping each other they form a dense sheet of green. Prefers north or east location on a building. Will climb any kind of a wall. 50c each.

Engelmanns Ivy—A rapid growing vine of the Virginia Creeper but has a character of its own. Leaves smaller but more dense. Foliage of deep green. Will cling to any rough wall. 50c each.

wisteria is one of the most decorative of vines, and for porch decoration without too much shade. Rapid grower. Long bunches of pale blue flowers in June. Our vines are grafted from blooming plants and not seedling. Seedlings sometimes do not bloom. 50c each.

A Word to the Wise-ORDER EARLY

Every year we are forced to disappoint many of our good friends who delay sending their orders until late in the spring. Each year the demand for Winfield Nursery Stock increases. Orders are booked in rotation and preference must be given first orders received. Don't wait until planting time to order. Order just as soon as you get this book and we'll reserve your needs until shipping time. Make sure NOW of getting good stock—the kind that will grow and make REAL MONEY for you.

Plants for Ornamental Hedge Fences

PRIVET AMOOR RIVER NORTH—The hardiest of all privets. Shears well in any shape and withstands the cold weather.

Good plants, 12 to 18 inch	\$ 5.00 per 100
Heavy plants, 18 to 24 inch	8.00 per 100
Extra heavy, 2 to 3 feet	10.00 per 100

PRIVET, California—Almost evergreen dark shiny leaves. Kills to ground in zero weather.

Nice small plants, 12 to 18 inch	\$5.00 per 100
Heavy, 18 to 24 inch	7.00 per 100

PRIVET A. R. SOUTH—Nice evergreen privet but winter injures sometimes to the ground, but soon is up to usual height.

12 to 18 inch\$6.00 per 10	\$6.00 per 100
----------------------------	----------------

Evergreens

We have a large selection of evergreens in many varieties but they must be seen to appreciate them. We are listing only a few that are well known. The best way to buy specimens is to pay us a visit.

ARBOR GOLDEN—The showiest of all Arbor Vitae. The tips are always tinted with a golden color, seldom ever grows over four feet tall.

15 to 18 inch iuil	1.00
18 to 24 inch full	1.50
2 to 3 feet	2.00

ARBOR COMPACTA—Same as the above only all green and grows some taller. However, it can be trimmed and kept at any height.

18 to 24-inch	\$1.00
2 to 3 feet	1.50

JUNIPER VIRGINIANA—It is a slim tree and is one of the best for trimming into spikes or any shape. These plants are very compact.

2 to 3-foot size	\$1.00
3 to 4-foot size	1.50
4 to 5-foot size	3 ,00
5 to 6-foot size	4.00

Ornamental Trees

CATALPA BUNGEI (Umbrella Tree)—Grafted on heads 5 to 6 feet high. A unique tree for lawn planting. Very hardy and will stand drouth. 5-foot stems, \$1.25; Larger trees 6-foot stems, two-year heads, \$1.60.

POPLAR LOMBARDY—The slenderest tree known. Good for screening, and formal effects. Very fast growing.

5 to 6-foot	.25
6 to 8-foot	.35
8 to 10-foot	.80
10 to 12-foot	1.00

AMERICAN ELM—One of our grandest native trees. Well known.

	Each	Per Doz.
6 to 8 feet	\$.75	\$ 6.00
8 to 10 feet	1.25	11.00
10 to 12 feet	2.00	20.00

SOFT MAPLE—This tree is very well known. Fast growing, but is losing its popularity.

6 to 8 feet	.75
8 to 10 feet	1.00

WEEPING WILLOWS—Fast growing tree that has long, drooping branches that touch the ground. Beautiful tree, need to be well watered.

5 to 6 feet	\$.50
6 to 8 feet	75
8 to 10 feet	1.00

Forest Tree Seedlings

RUSSIAN MULBERRY—The best for hedges, post-wood, or timber. Good wind break. Can be used for a hedge around your cherry orchard for protection against bird injury to fruit. Birds prefer them to cherries.

OSAGE HEDGE—One of the best trees known for post or fences. Well known plant.

BLACK LOCUST—Wood is very valuable for post, growing quicker to a given time than any other hard wood tree.

CATALPA SPECIOSA—It is hardy, grows rapidly on prairies, resists drouth and hardly has insect enemies. As a post it ranks with locust and Osage Orange.

The Chinese Elm

The Tree That Is Fast Becoming "America's Most Popular"

We are very fortunate in being able to present this season a very unusual selection in this popular Elm. Ours are nice, straight, well-rooted trees.

There are many other things, too, that make the Chinese Elm so desirable: chief of these being its very rapid growth (it probably grows faster than any other shade tree), and its marvelous adaptability to soils and conditions where other varieties cannot thrive. For the western, arid sections it is positively unexcelled—it is ideally suited to the dry soil and extreme temperatures. It develops into a splendid shade tree, tall, broad and protective, besides being a useful windbreak tree. Since its introduction by the Department of Agriculture about

20 years ago, it has undergone the most rigid experiments, and does well in practically every locality of the United States. We cannot recommend it too highly.

We have a splendid stock of Chinese Elms this season, but limited, so order early.

PRICES

Note These Remarkably Low Prices on

CHINESE ELMS

Less than one-half of what you will pay elsewhere.

	Each	Dozen
3 to 4 feet	\$.25	\$ 2.40
5 to 6 feet	.60	6.00
6 to 8 feet	.75	8.00
8 to 10 feet	1.35	12.00
10 to 12 feet	1.75	20.00

All Well-Rooted, Straight, Smooth Trees

Asparagus

Asparagus is another delicacy that comes early from the vegetable garden. Like all very early vegetables, it costs quite a good deal; and yet a bed of asparagus in your garden will keep your table supplied and last for years. We handle two-year crown plants which will throw up sprouts for use the first year.

Martha Washington, Palmetto, 12 100 1000 or Conover's Colossal...... \$.50 \$2.50 \$11.00

Horse Radish Cuttings .50 doz. Clumps 1.25 doz.

Rogers Giant Wine-Red Rhubarb

This variety is the kind that is proving so successful and profitable to commercial gardeners. We have been growing this wonderful variety over a long period of years and thoroughly recommend it to our customers. Rogers' Giant Wine-red will not "seed" as it is propagated from divisioned plants. Every stalk is alike. All big and crimson-red in color. Very sweet and tender. A home garden should have at least two dozen plants. Do not pull rhubarb the first year. There is danger of pulling the roots loose from the soil.

Price:

75c per dozen; \$5.00 per hundred; \$50.00 per thousand.

Why buy weak, slim, light-weight plants and wait for years to obtain an effect when Rogers' bushy, thrifty, well-rooted_stock costs very little, if any, more?

Paper Shell Pecans

PAPER SHELL PECANS—The demand for these nuts increases from year to year. The Pecan has, by means of selection, been made to produce the fine thin-shelled, large fruiting varieties. We recommend for your use the Stuart and Success thin-shelled varities. Nice well-rooted trees, 2 to 3 feet, at 90c each.

Gooseberries

An exceedingly profitable fruit when properly handled. The market is never supplied here to any extent. Gooseberries can be gathered and marketed over a long season. Every home garden should have a dozen or so bushes, as you will find gooseberries are very easy to grow. The fruit is extremely desirable for many uses. Gooseberries require very little room and attention.

Big 2-year plants, all varieties, 15c each; \$1.50 per dozen.

HOUGHTON—The old standard variety; bush drooping, hardy and prolific.

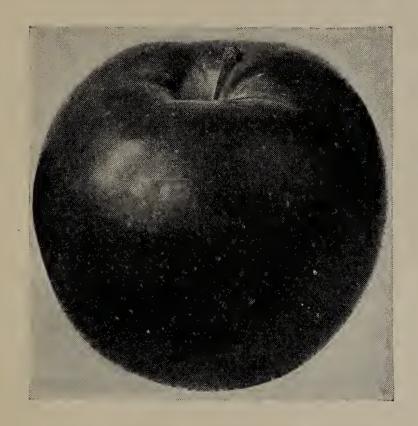

DOWNING—Larger than the Houghton, roundish; light green, juicy, fine quality; bush more upright than Houghton.

CARRIE—This variety originated in Minnesota and has proven hardy and vigorous in nearly all sections. The plant makes an exceptionally strong growth and produces larger crops of berries than any other variety we offer. When fully ripe the berries are red. Quality good.

PEARL—The finest berry we have tasted; very large, round, juicy, extra quality. Two-year bushes of this grand new variety tried here were covered with berries which measured one inch in diameter.

Apples

The first fruit in importance is the apple

WINESAP

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{5}{16}$ to $\frac{7}{16}$	\$.20	\$1.75	\$14.00
3 to 4	$\frac{7}{16}$ to $\frac{9}{16}$.25	2.25	15.00
4 to 5	$\frac{9}{16}$ to $\frac{11}{16}$.30	2.50	20.00
4 to 6	$\frac{11}{16}$ and up	.35	3.00	25.00

Summer Apples

YELLOW TRANSPARENT—This variety is somewhat more conical than Early Harvest, more yellow and better flavored. The color is a clear, bright yellow when ripe, but the fruit is fit to use long before it reaches maturity. One of the earliest.

LIVELAND RASPBERRY—One of the handsomest of summer apples, and among the best quality. Skin clear, waxen white, striped and mottled with crimson.

RED JUNE—Among strictly summer apples the Red June is the best. Its deep red color, excellent quality, and good bearing quality, makes it a favorite.

DUCHESS—An attractive yellow apple. Almost covered with red stripes. The flesh is juicy and tender, fine to bake. Bears young. Good for home use.

EARLY HARVEST—A yellow apple known to most people. Good for home use.

COOPER'S EARLY WHITE—The one early apple in Southern Kansas and Northern Oklahoma which should be in every home orchard. Bears young and is a real apple. Color almost white.

Autumn Varieties

GRIMES GOLDEN—This is the best early winter variety. It is a golden yellow color. Uniform in size, and possessed of a texture and flavor that is pleasing to the palate. Very good cooker. One of the best commercial varieties.

JONATHAN—The color is a cheerful red and waxy skin. Its juicy snappy flavor makes it appeal to the consumer. One of the five best commercial varieties.

WINTER BANANA—This is not a winter variety as the name applies. Ripens in early fall. It is a clear yellow. Bears young, good cooking apple and one that should be planted more freely in this section.

KING DAVID—Very productive, bearing good crops year after year. This variety is similar to Jonathan only more tart. Good size, very rich red, almost purplish black on the sunny side.

Winter Varieties

ROME BEAUTY—Of the large, round, red apples this is one of the best. The flesh is firm, juicy, mild, pleasant flavor and excellent for eating.

WINESAP—One of the oldest and popular varieties, being a good shipper and keeper in storage. Splendid bright red. Flesh tinged with yellow. Very firm, juicy and good flavor. The best commercial variety for this country. Eighty per cent of the trees growing in the commercial orchards for Kansas and Oklahoma are Winesap.

YORK IMPERIAL—An old-time favorite with many people. This variety is still planted in home orchard but not so much for commercial use.

BEN DAVIS—Striped red, large and attractive. Sure bearer. The tree is a rank grower. Its greatest fault is the quality.

GOLDEN WINESAP—The Golden Winesap is a handsome yellow apple and is a rival to Grimes Golden, being much larger and hardier.

DELICIOUS RED—It is delicious in every sense of the word. Beautiful red color. Most wonderful eating apple and demand a good price. The blossom end of the fruit is five lobed. Good keeper and good cooking apple. Plant this apple.

STAYMAN WINESAP—This tree is a strong grower, and the fruit is large mighty good apple. Color red. Its faults are that it sometime cracks if the seasons are dry.

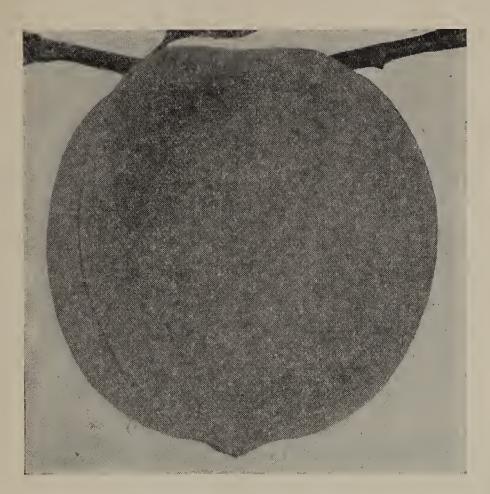

Crab Apples

FLORENCE—A crab larger than the Transcendent. The quality is excellent. We have found this variety the best of all crabs.

WHITNEY—A popular crab of good size. Fruit is attractive yellow striped with red. Good quality.

TRANSCENDENT—The fruit is brilliant bright red of fair quality. The fruit is good for jelly and preserves.

Peaches

Height	Diameter			
in feet	in inches	Each	10	100
2 to 3	$\frac{5}{16}$ to $\frac{7}{16}$	\$.15	\$1.40	\$12.00
3 to 4	$\frac{7}{16}$ to $\frac{9}{16}$.20	1.75	15.00
4 to 5	$\frac{9}{16}$ to $\frac{11}{16}$.25	2.25	20.00
5 to 6	$\frac{11}{16}$.30	2.50	22.00

EARLY ELBERTA—A sure money maker for the commercial orchard. Size and color as the late Elberta, but ripens 8 to 10 days earlier.

MAYFLOWER—Very early, ripening about June 10th. Large, very attractive, as it is a bright red. Flesh yellow. Semi-cling. Bears young.

CRAWFORDS, Late—Of good size; golden yellow with deep red cheek. Ripens around September first.

CHINESE CLING—A large globe-shaped, creamy white peach with red cheek. The best of all clings in our opinion. Ripens around first of September.

CARMEN—It is a real white peach and ripens before other white peaches. Very hardy in the bud, missing frost when other fail. You will like this peach. Freestone and good canner.

JAPAN BLOOD DWARF—This peach cannot be recommended too highly. It is of Japanese origin. The tree does not grow large. It is a heavy bearer and should be thinned when heavy loaded with fruit. The fruit is of a dark red and red flesh. Juice is blood red. Looks like beets when canned. Freestone. Bears young. It is best early peach we have ever grown. No orchard is complete without this peach.

RED BIRD CLING—A creamy white peach, almost covered with red. Large, hardy, and good. An extra early good cling. Ripens about July first. The same as Early Wheeler.

ELBERTA—The standard market peach of the entire country. Very large. Yellow with red blush; flesh is yellow, tender and juicy; very highly flavored. Rank, vigorous grower. Does well in all peach growing sections. Ripens middle of September.

CHAMPION—Considered the highest in quality of all white peaches. Flesh tender and juicy, with pleasant flavor. Skin is a creamy white with splashes of carmine and red. Tree is vigorous, healthy and productive. Ripens in late August or early September.

J. H. HALE—It ripens a few days ahead of Elberta. It is a deep golden yellow color overlaid with bright carmine and of the best of quality. Whether in home orchard or commercial orchard, you should plant some Hale.

HEATH CLING—Said to be the oldest peach in cultivation. It is the best peach for preserves and pickling. Flesh white, skin well colored. Ripens in September.

HENRIETTA CLING—Yellow with a crimson blush. A large, firm, juicy peach of most pleasing flavor. Ripens about September 20th.

ORANGE CLING—One of the best, ripening in August or September. Good flavor and bears heavy.

INDIAN BLOOD CLING—A very large cling peach, one of the best for pickling and preserving. Ripens about September first.

BELLE OF GEORGIA—A creamy white peach with a beautiful crimson cheek, grown largely for a commercial peach, but should be in every home orchard. The trees are hardy, vigorous, and very productive. Not quite as good a quality as Champion. Ripens a few days before Champion.

For Your Information

Age of Bearing-Space Required, Etc.

As the age of bearing depends so much upon variety, soil, climatic conditions and care given, this can only be an approximate table under average conditions. To ascertain the number of trees or plants required for any given space, multiply the length of the space by the breadth to ascertain the number of square feet contained therein. Then multiply the distance apart you intend to set your rows by the distance between each tree or plant in the row to get the number of square feet each tree or plant will take. Divide the number of square feet in the given space by the number of square feet each tree will require and the result is the quantity of trees or plants required for that given space.

	A	ge of	Distance

5 to 6	$\frac{11}{16}$ and up	.48	4.30	35.00

KIEFFER—One of the most popular market pears grown. The tree is a vigorous and upright grower, bears young and heavily, and is almost exempt from blight. The fruit is of good size, rich color and of fair quality. Ripens fall.

BARTLETT—The fruit is large, yellow with a beautiful blush. Good quality. The tree blights in some sections. Ripens last of August.

SECKLE—The Seckle is often called the Sugar Pear. This fruit is small in size but of excellent flavor. It is generally well known. Ripens August 15th to September.

GARBER—The tree is thrifty and bears young. It is almost blight-proof. The fruit ripens the last of September and sells readily on the market. It is of medium size, yellow and well covered with red.

THE NEW DOUGLASS—Beautiful, large, smooth pear with golden yellow color, flecked with russet. Flavor is delicious, sweet, melting and juicy. Blight-proof and resistant to disease. A regular croper in all soils. Bears while tree is very young—some have fruit first year.

DUCHESS—A large showy pear, often weighing a pound each; greenish yellow, rough uneven surface. We consider the Duchess to be the most profitable dwarf pear in this section. The tree is dwarf; does not blight, heavy bearer. Ripens September to October.

Apricots

Prices:

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{5}{16}$ to $\frac{7}{16}$	\$.25	\$1.75	\$15.00
3 to 4	$\frac{7}{16}$ t9 $\frac{9}{16}$.30	2.50	22.00
4 to 5	$\frac{9}{16}$ to $\frac{11}{16}$.40	3.50	28.00
5 to 6	$\frac{11}{16}$.45	4.00	30.00

MOORPARK—The fruit is large, orange color with a red cheek. Sweet and rich. A freestone. Ripens in early July. Fine quality.

OKLAHOMA—A variety being propagated by us from a hardy strain offered by one of our Oklahoma customers who say that it has borne fruit almost every year. It is of good size, quality and color good.

SUPERB—One of the best of the Apricots being offered. It is of Kansas origin. It is especially adapted to Kansas and its territory. Ripens after Moorpark.

Cherries

Cherries are one of the most popular fruits. Its hardiness, and the fact that it bears annually are strong recommendations. The cherry can be grown on any kind of soil, but prefers a moderately heavy loam. The soil must be well drained. Cherry trees will do better under neglect than any other fruit tree. They need very little attention after transplanting; no pruning and very little spraying. They come into bearing the third or fourth year after planting.

All Cherries Except Kansas Duke

Height in feet	Diameter in inches	Each	10	100
2 to 3, 1-year	$\frac{5}{16}$ to $\frac{7}{16}$	\$.20	\$2.00	\$18.00
3 to 4, 1-year	$\frac{7}{16}$ to $\frac{9}{16}$.30	2.60	20.00
4 to 5, 2-year	$\frac{9}{16}$ to $\frac{11}{16}$.35	3.00	25.00
5 to 6, 2-year	$\frac{11}{16}$.40	3.50	30.00

MONTMORENCY—With Early Richmond, it is the most widely and numerously planted cherry and the most productive and regular bearer. Colors early before ripe. The fruit is roundish, plump, flattened at the end, and a beautiful glowing-red. It hangs in clusters. The flesh is rich and pleasant; of reddish color, tender and firm. A good shipper and canner. The tree is a vigorous, upright grower, but will not quite equal Early Richmond in production qualities. Ripens about the second week in June.

EARLY RICHMOND—Sometimes called the Early May Cherry. It is the favorite early cherry and next to Montmorency, the most popular of all the sour cherries. The fruit is of medium size, roundish shape, flattened at the end; flesh light color, tender and sprightly. A good canner. The tree is medium size, vigorous, upright, spreading, productive and long-lived. Ripens about a week earlier than Montmorency. We suggest that you set one-half of your sour cherries to this variety and the other one-half to Montmorency.

KANSAS DUKE—Our Kansas Duke is a large semisweet cherry of deep red color, juicy and rich. The flesh is reddish. The fruit is of the best delicious

flavor and is very excellent for eating fresh. Plant a Kansas Duke cherry if your have room for only one tree. The tree is especially attractive as it is an upright, compact grower, which together with the heavy dark green foliage, makes it a beautiful tree for lawn planting. The Kansas Duke is a prolific bearer and the abundant crops make it especially desirable for home use. It is the nearest sweet cherry that is a success in this climate. Ripens about a week before Montmorency.

Nectarines 4 to 5 feet - each 60c

Quince 4 to 5 feet - each 60c

Plums

Plums are especially good for eating fresh, for jellies and preserves, and are unexcelled for canning. Some varieties will thrive wherever apples or peaches can be grown. Most of them, especially the northern Hansen types, bear the third or fourth year. One of the best fruit trees for the home garden and very profitable in the commercial orchard.

First Class Stock in Every Particular

Height in feet	Diameter in inches	Each	10	100
2 to 3	$\frac{5}{16}$ to $\frac{7}{16}$	\$.20	\$1.50	\$13.00
3 to 4	$\frac{7}{16}$ to $\frac{9}{16}$.25	2.50	20.00
4 to 5	$\frac{9}{16}$ to $\frac{11}{16}$.30	2.60	25.00
5 to 6	11 16	.35	3.00	27.00

Compass Cherry Plum

It is absolutely hardy everywhere. Originated at Springfield, Minnesota. It is a cross between the Sand Cherry and the Miner Plum. The fruit is nearly an inch in diameter; bright red, sweet and juicy and of very fine flavor. When young and green the fruits have the appearance of plums, but as they mature become round like a cherry. The pit is somewhat elongated. For canning and table use the fruit is unsurpassed. The tree bears young, regularly and abundantly. Should produce some fruit the next year after setting out. Does well from Texas to North Dakota and is especially valuable for all parts of Kansas, Oklahoma, Missouri, Nebraska and Colorado.

ABUNDANCE—The tree is small, but hangs loaded down with fruit. The fruit should be thinned to allow room for development. It is one of the hardiest and best of the Japanese varieties. The fruit is large, oval and in color amber, changing to cherry. The quality is very good.

BURBANK—The Burbank is a later and somewhat more vigorous variety than the Abundance. It is a dark red, roundish Japanese plum and of good quality. The flesh is a deep yellow, firm, very juicy and sweet. It is considered to be the hardiest and most prolific of the Japanese varieties.

SHIRO—Large, round, golden-yellow plum of excellent appearance and fine quality, ripening in early July. It is very popular with many of our customers.

SATSUMA—Large and flesh blood-red. Bears young and is very prolific in Oklahoma, Colorado and New Mexico.

GERMAN PRUNE—Where prunes are a success the German Prune is a valuable plum of fair quality for dessert but most esteemed for drying and preserving. The fruit is large, purple, with a thick blue bloom. The flesh is firm, sweet and pleasant, separating from the stone.

OPATA—One-year-old trees set fruit buds freely. Our largest size trees will bear the year following transplanting. This variety is a cross between Sand Cherry and the Gold Plum, a very large plum, for which \$3,000 was paid when first introduced. The tree resembles the plum in its habit of growth. The fruit is one inch or more in diameter; small pit. It is a dark purplish-red, with blue bloom.

WANETA—A norther variety. The fruit is bright red, measuring almost two inches in diameter. Recommended for dry climate and where the frost is a habitual visitor. Very hardy and an exceedingly heavy bearer, as it never misses.

Grapes

AGAWAM

Heavy No. 1 well rooted plants

1 wo year old					
Kind	Each	12	100	1000	
Concord	\$.10	\$.75	\$4.00	\$35.00	
Worden	.12	1.00	6.00	50.00	
Campbell's Early	.15	1.25	7.00	60.00	
Moore's Early	.12	1.00	6.00	50.00	
Niagara	.12	1.00	6.00	50.00	
Agawam	.12	1.00	6.00	50.00	
Salem		1.00	6.00	50.00	
Caco		2.50			

CAMPBELL'S EARLY—Bunch and berry better than the average black; of fine quality and keeps long after ripening. Ripens with Moore's Early, and we believe it to be a better grape.

MOORE'S EARLY—Bunch of medium size and compact. The berry is very large, black and of good quality. Bears regularly, but not as heavy as Worden. It is a good market grape on account of its earliness, ripening the last of July.

WORDEN—The best black grape we have found. The bunch is large, compact and ripens evenly. The berry is large, thin skin, and very fine flavor, rich and very sweet. The vine is perfectly hardy, bears heavy and is very prolific. The fruit readily sells at double the Concord price.

CONCORD—The old, well-known black grape, being of good flavor and fair quality. The vine is hardy and bears heavy crops with regularity, ripening about the third week in August.

NIAGARA—We believe this to be the best white grape grown. The bunches are large and long. The quality is of the best. Very hardy, bears regularly and abundant crops and proves profitable as a commercial variety here.

AGAWAM (Rogers' No. 15)—The most widely known of the Rogers' Hybrids. The bunches are large. The berry is large, rich and sweet. The vine is vigorous. The Agawam ripens after Concord and can be kept much longer and improves in flavor. Seems to prefer clay coil. Of the red grapes, it is the easiest grown and one of the most dependable. For home and market use.

SALEM—A rich, dark red, early grape of excellent flavor, as are all Rogers' Hybrids, ripening slightly before Concord. An excellent garden variety.

CACO—A vigorous, prolific grower. The Caco is a hybrid produced by hand pollenization of the Catawba and Concord. It is perfectly hardy grape, beautiful, large wine-red. Extremely rich, sugary flavor. It is making good in all soils and sections, so that we can recommend it on the basis of performance. Ripens in advance of Concord. The vine is very strong, vigorous grower, healthy and prolific. The fruit sells in the open market at double the price of other varieties.

Raspberries

WINFIELD RASPBERRY (The Wonder in Berry Production)

This grand new blackcap originated at Winfield, and after ten years of testing has proved itself the "King of Blackcaps."

In hardiness and productiveness it is unexcelled by any other variety. Has never winter-killed through ten seasons' fruiting, and stands extreme droughts.

The fruit is of enormous size, single berries often covering a quarter. Four to six great clusters are produced on each cane, averaging from three to six quarts to the plant. Fruit is firm, sweet, rich and juicy; seeds very small, fine flavor.

Bush is heavy and vigorous, making robust, stocky canes, easily supporting their heavy loads. Not troubled with rust or anthracnose. Succeeds on all soils.

Its firmness and size make it unexcelled for market. Readily brings 50c to \$1.00 a crate more than other blackcaps. Easily nets \$300 to \$500 an acre. The one

sure Raspberry for you to plant.

Plant 3 to 4 feet apart in rows 6 feet apart. Deep soil that will retain moisture in a dry season is preferable, the lighter loam for the red varieties, the heavier for fhe black. Allow 4 to 6 canes to grow from each plant tor fruiting: pinch off the canes when 2 to 3 feet high

Plum Farmer		5.00	40.00
Latham		5.00	40.00
		7.00	50.00
Chief			

Cut out all old canes when bearing season is over, as a cane bears but once. A mulch should be applied the first fall.

PLUM FARMER—A splendid black raspberry that has already proven itself one of the leading and most profitable varieties. The plants are very vigorous and have a silvery-bluish appearance when ripened. The fruit is grayish-black, very firm, a good shipper, attractive and splendid flavor.

LATHAM—Yields twice as much as other red raspberries. A new red raspberry that was originated in Minnesota and acclaimed for its hardiness in that state. During the past few years its merits have

spread with its planting throughout the middle west. Produces very strong, vigorous canes, very productive. Berries are large, of highest quality, ripen evenly and hold up well throughout the season.

Chief Red Raspberry

The New Hardy Disease-Resistant Early Raspberry

CHIEF—The new Chief Raspberry has been grown in test grounds all over the country during the past ten years, and the following facts have been proven:

Hardiness. Chief originated in Northern Minnesota. It is perfectly hardy and is recommended by the Minnesota Department of Agriculture.

Disease Resistant. Being an offspring of the famous Latham it has all the disease resistant qualities of its parent.

Productiveness. Its extreme hardiness and resistance to disease makes it a very robust grower a a heavy bearer. In many tests it has outyielded Latham.

Earliness. Chief ripens 10 to 12 days ahead of Latham, placing it on the market with the benefit of early high prices.

Quality. The exceptionally fine flavor places Chief in great demand not only as a table berry, but also as a canner. The fruit is dark red, of good size and an excellent shipper.

CUMBERLAND—The most widely known black raspberry. Planted because of its productiveness and quality. Berries are extra large, fine and sweet. It is usually hardy.

Dewberries

The Dewberry is a dwarf and trailing form of the blackberry. The fruit is highly prized as a market fruit owing to its large size and fine quality. Set the plants two feet apart in the row and cover in winter with coarse litter. Should be mulched in the spring to keep the fruit off the ground.

Selected No. 1 Strong, Healthy Plants

	12	100	1000
Thornless Dewberry	\$1.00	\$5.00	\$40.00
Lucretia	.70	3.00	25.00
Austin	.70	3.00	25.00

berry. The fruit is large and of good quality, very sweet and of delicious flavor. The canes are very vigorous and productive. Ripens early.

AUSTIN—Similar to Lucretia, but not its equal in the North. Recommended for our Southern Oklahoma and Texas trade. It originated in Texas.

THORNLESS—This Dewberry is absolutely thornless. The bush is very hardy and makes a vigorous growth. Although being a late introduction, the Thornless Dewberry is of proven merit. It is a good bearer. The fruit is very large, jet-black, juicy, sweet and of very fine flavor.

Blackberries

FOR PROFIT

One acre of Blackberries will net more cash money than thirty acres of wheat or corn. A proven fact for the past five years.

No. 1 Root Cutting Plants. Not Sprouts

Kind	12	100	1000
Eldorado	\$.75	\$3.50	\$25.00
Early Harvest	.50	2.50	15.00
Mersereau	.75	3.50	25.00
Blower	.75	3.50	25.00

ELDORADO—Very hardy—never winter-kills—the best commercial variety. Always free from disease—immune to orange rust. Berries are of good size, color, flavor and quality. A wonderful shipper. Fruits over a long season and insures a big profit to the grower.

EARLY HARVEST—This, along with Mersereau, is our favorite. The bush is perfectly hardy, cane stiff and upright. The fruit is of good size, long, and has very small seeds. The Early Harvest has never failed, despite our occasional dry seasons. In productiveness the Early Harvest is a surprise to everyone, the bushes being weighted to the ground with fruit. Set one-half of your acreage to this early variety.

MERSEREAU—Some nurserymen have a dewberry mixture in the plants which they are offering for Mersereau, which has hurt the reputation of this wonder blackberry. Our Mersereau are of the genuine strain, and we feel that for a late berry no variety is better. Our genuine Mersereau are, without a doubt, the blackberry of all blackberries. It is very large, jet-black, luscious and has all the qualities of an ideal berry.

BLOWER—Highly recommended. Large size, good flavor, jet-black; good shippers; hardy; prolific bearers. Does not winter-kill, and from all indications is a valuable kind.

For Windbreak CEDAR SEEDLINGS

8 to 12 inches, puddled 15c each \$10.00 per 100

CONSULT US

If you wish information or advice on any phase of fruit growing, from selection of varieties to marketing the fruit, we will be glad to serve. Our long experience here enables us to give you sound advice. Our offer of service is included with every order.

Strawberries

Kind	100	1000
Mastodon	\$1.50	\$12.00
Senator Dunlap	.75	5.00
Aroma	.75	5.00
Champion	1.25	9.00
Blakemore	1.00	6.00
Klondike	.75	5.00
Premier	1.00	6.00

Mastodon Everbearing Strawberry

Without a doubt this is the everbearing Strawberry. In the spring crop the berries are large, sweet, well flavored and will equal Senator Dunlap for bearing qualities. It bears excellently during the summer months and also does extra well during the fall bearing season. This variety is good and we heartily recommend that each of our customers buy a hundred or two hundred plants for their garden.

SENATOR DUNLAP—There is no known variety that is so universally popular nor one that is so extensively grown as the grand old Senator Dunlap. The fruit is very large, rich red, and of remarkably fine flavor. In addition to this, it is a heavy producer, a splendid keeper, and cannot be excelled for shipping. The fruit begins to ripen soon after the earliest sorts and continues until near the end of the season. The plant is unusually hardy, stands our summer drouths well, and will respond readily to care.

AROMA—Another fine old variety that has retained its popularity down through the years. The fruit is large, bright red and of delicious flavor. A good shipper on account of its firm texture. The period of bearing is long and it is a heavy fruiter, but does not bear as heavy as the Senator Dunlap. The Aroma is the commercial strawberry of the Ozark region, because of its good shipping qualities.

CHAMPION (Everbearing)—The berries are larger than Progressive, quality as good or better, and a rich red color. For a family of two or three 100 to 200 plants will amply supply your table.

BLAKEMORE—An early variety originated and developed by the United States Department of Agriculture, and has been thoroughly tested in all parts of the country. Dark, red fruits of good quality and fine flavor. Because of its excellent keeping and shipping qualities, it is becoming a popular variety in the South to ship to the early Northern markets.

KLONDIKE—The leading market variety of the Southern states and a favorite among our Oklahoma friends. Does not do so well further north. The berries are of medium size, deep crimson, quality fair to good. The foliage is resistant to disease. The plants make runners freely. The berries ripen evenly and are firm enough to ship long distances.

PREMIER—We recommend this for either home or commercial planting, being among the first to ripen. a heavy yielder and makes thrifty growth; the fruit is large size and of deep red color, firm and very good flavor.

For Your Information

As we invite your orders for the trees and plants we illustrate and describe, you may ask—and surely you are entitled to know—who we are, and what our business record is; how we have served other buyers and why we know we can serve you to your satisfaction and profit. The facts below are to give you that information.

Well Established

The Winfield Nurseries were founded over forty years ago. When children at school, you will remember reading in your histories and geographies that "Winfield is noted for its stone quarries and nurseries." The present personnel has had charge for about ten years. For that period while growing, selling and improving the standard of our products, we have also been training men in every department of this highly specialized work. Once a group of pioneers, we are now an organization of experts. It is not uncommon to hear of some nurseries that have been in the same family for generations. Ours is no exception. The personnel of our organization started working in the nursery as boys, as have also most of our present employees.

One Hundred and Fifty Acres in Nurseries

Our growth has been gradual, but steady, to meet both in quality and kind, the increased demand of buyers. Our big plantings in the Arkansas River Valley in Southern Kansas, favored by fertile soil, are also disciplined by climate that produce the best and hardiest trees and plants, thrifty and full of vitality.

Packing, Shipping and Storage Facilities

Our packing, storage and shipping facilities have kept pace with the growth of the business. We have one of the most modern equipped packing and storage nursery plants in the middle west. This assures you that your order will reach you in good, fresh condition. Our whole output is handled under cover at all seasons of the year—a part of our progressive methods that guarantee the freshness, grade and quality of our stock. We have ample shipping facilities out of Winfield; the Santa Fe, Southern Kansas, Frisco and Missouri Pacific railroads running several trains daily in all directions. The Railway Express Agency, Inc., carries express over all lines.

What We Agree to Do

We take all risks of transportation and guarantee the delivery of stock in good order. If not in first-class condition on arrival notify us and we will immediately forward new stock to take its place under the same guarantee. Should any plant die during the first season after planting, having had good care under a normal growing season, we will replace same at one-half the purchase price.

Non-Warranty—In the event that any stock sold by us should prove untrue to name under which it is sold, we hereby agree on proper proof of such untrueness to name to replace that portion of the order proven untrue to name or to refund twice the purchase price thereof. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, productiveness, or any other matter.

Prices

Prices quoted herein mean that the specified stock will be packed free of charge and delivered in good condition to the transportation company. Our quality plants are priced low, so get your order in early while we have a surplus in all varieties.

Co-operative Buying

If you will get your friends and neighbors to order with you and the total number of trees amounts to 100 (or 1000), each one of you will be entitled to the 100 (or 1000) rate on each kind or variety.

Send in their names. We will send a new Catalog and orderblank to each one, and tell them it is at your suggestion.

Let each one fill out his individual order—with our advice if desired; then you can send them in with your order.

These orders will be put up in separate packages; they will then be shipped all together in one packing case to anyone you wish for distribution, which will effect a saving to each one of you on transportation charges, or they can be shipped to each buyer separately.

How to Ship

Orders will be shipped by freight, express, or parcel post (for small orders of grape vines, blackberry plants, etc.) as you wish. It is best, however, that most orders be shipped by express as this service is prompt and satisfactory, delivery being made to you at once within a few hours after leaving the nursery. Freight shipments, being slow, there is some danger of the stock drying out. Our fruit trees are too large for parcel post shipment.

Transportation Charges

We prepay transportation charges on all orders amounting to \$25.00 or more.

Time of Shipment

Please advise the approximate time you want your order shipped. We will ship your order as nearly as possible on the date you indicate. You must remember that we are governed in this matter by weather conditions. You may be assured that we will use our best judgment and will advise you beforehand as to the shipping date that you may be looking for the shipment. Our shipping season opens in the fall about October 20th and closes in the spring about May 20th. While you have plenty of time in the spring to plant it is advisable to have your stock ordered and set it out as early as the weather will permit.

Remittance

Should be made by postal or express money order, bank draft, or we will take your personal check if you prefer. Do not send currency, as it is unsafe.

Reference

As to our financial responsibilities we refer you to the First National Bank or any business house of this city. As to fair dealings and trustworthiness we offer you any of your friends who may have purchased stock of us heretofore. Your neighbor may be one of our customers. Ask him.

Stock Healthy and Free from Pests and Disease

State Inspectors examine our stock of trees regularly and thoroughly and every shipment that goes out bears an official certificate of inspection.

Office of the State Entomologist, University of Kansas.

No. A 2347 Lawrence, September 15, 1932.

Certificate of Nursery Inspection—This is to certify that in accordance with Section 2-703 of the Revised Statutes of 1923 the nursery stock now growing for sale by Winfield Nurseries (Thos. Rogers & Sons) of Winfield, Kansas, has been inspected by a duly authorized inspector, and found apparently free from dangerously injurious insects or plant diseases.

Invalid after June 1, 1933.

.H. B. HUNGERFORD, State Entomologist

THE PRINTER LOSES—YOU GAIN!

Instead of our usual expensively printed and illustrated catalog you are receiving this simple price list. By so slashing our printing bill we are able to make sharp reductions in the costs of our entire nursery stock to you. Actual color illustrations, fine paper and lengthy descriptions are fine but we feel that you would much prefer this plain and inexpensive catalog so long as you are benefited by lower prices.

Thousands of dollars are saved to you by this economy. Compare this price list with our old, and you will see how sharply prices have been cut on everything.

We hope that you will agree to the wisdom of this action and that you will not be disappointed or inconvenienced in any way.
